评论: Go fast, go far ... with pleasure !
If you're looking for a new catamaran under 60ft, then **Class 6** is a wonderful platform for anyone looking for a fast and easy-to-sail multihull (short handed).

Class 6 is a fast yacht with a light displacement of 13.5T due to the quality of workmanship and top material/brands used. She will definitely shine in any race, with a slim hull to guarantee exceptional upwind capability. Such performance is key for security and sea motion during long passages.

- Carbon reinforced structure – Kevlar shield,
- Only 13.5T displacement for 64ft. length,
- Custom flybridge, cockpit and interior.

Class 6 is made for a couple to live onboard for sabbatic (and of course charter will be easier) with 4 principles :

- Huge space to feel like home,
- Sailing management solo,
- Real performances in comfort,
- Easy to maintain.

Laurent Bourgnon, set basis, for Class 6 to achieve our principles :

- Longitudinal beam to give comfort and enlarge living area,
- High freeboard to feel confident in any sea condition,
- No front beam for better waves passage in heavy seas,
- Mast position aft to reduce main sail area,
- Very long bimini to protect from the sun,
- Long aft platform for easy passage from yacht to sea.

SPINE CONCEPT : The secret to combine space and performance
Just like a spine on your body the longitudinal beam is there to carry the catamaran load due to mast efforts when sailing.

SPINE CONCEPT : Huge living area on racer
With 44 sq.m living area on the platform, Class 6 may be the largest living area available in its category.
But do not fool yourself ! You really keep racing pedigree.

WINDWARD ISLANDS GIVES YOU THE OPPORTUNITY TO DEVELOP A CREWED CHARTER BUSINESS THROUGH A TAILORED MANAGEMENT PROGRAM.

WINDWARD ISLANDS provides you with the opportunity to own a luxury catamaran without the expenses and challenges of traditional ownership.

TAKE TO THE SEA..... LEAVE THE PROBLEMS BEHIND !
