CLASS 6 (2020)

O Yachts 停泊于 毛里求斯

**评论:** Go fast, go far ... with pleasure !
**Class 6** is a wonderful platform for anyone looking for a fast and easy-to-sail multihull (short handed).

Class 6 is a fast yacht with a light displacement due to the quality of workmanship and top material used. She will definitely shine in any race, with slim hulls to guarantee exceptional upwind capability. Such ability is also the key for security and sea motion during long passages.

- Carbon reinforced structure – Kevlar shield,
- Only 16.8T displacement for 64ft. length.

Class 6 is made for a couple to live onboard for sabbatic (and of course charter will be easier) with 4 principles :

- Huge space to feel like home,
- Sailing management solo,
- Real performances in comfort,
- Easy to maintain.

**Laurent Bourgnon**, set basis, for Class 6 to achieve our principles :

- Longitudinal beam to give comfort and enlarge living area,
- High freeboard to feel confident in any sea condition,
- No front beam for better waves passage in heavy seas,
- Mast position aft to reduce main sail area,
- Very long bimini to protect from the sun,
- Long aft platform for easy passage from yacht to sea.

SPINE CONCEPT : The secret to combine space, performance and comfort at sea.
Just like a spine on your body the longitudinal beam is there to carry the catamaran load due to mast efforts when sailing.

The owner of this Class 6 wishes to acquire another Class 6 "full carbon" and therefore offers his boat for sale.
This one is "full options"! And is fitted with a "high performance" carbon rigging, with magnificent Northsails 3DI sails, and a dedicated hydraulic system that allows control of the rig and set of sails.
A single person can therefore manage the whole boat in all conditions!

Complete listing, additional pictures & videos on request.
